I am using GDB serial monitor to check my code. I am using the following code in GDB:- `loop() { GdbServer loopserver(8080); loopserver.client.print("$"); }` This above code is sending a loop () sequence but i want to send this sequence one by one to each servo motor. How to do it? A: One way to send commands to the Arduino YUN is to use the Serial Monitor, send a command, then wait for a response (maybe a few seconds). This is a very basic example where I am taking the input from the serial monitor and send it to one of the servos. This assumes I have a servo library set up, such as cwiid (suggested in the comments): `void setup() { Serial.begin(9600); Serial.println("Starting loop()"); } void loop() { if(Serial.available()) { String command = Serial.readString(); if (command == "go") { for(int i = 0; i`

Q: Add role to user on default installation of magento I want to add admin role to my user account on default installation of magento. But it seems the role is already there and
